DETAILED ACTION

Response to Appeal Brief

1. In view of the appeal brief filed on April 9, 2004, PROSECUTION IS HEREBY REOPENED. A new ground of rejection is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

- (1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,
 - (2) request reinstatement of the appeal.

If reinstatement of the appeal is requested, such request must be accompanied by a supplemental appeal brief, but no new amendments, affidavits (37 CFR 1.130, 1.131 or 1.132) or other evidence are permitted. See 37 CFR 1.193(b)(2).

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 23, 35, 58, and 70 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wood et al. (U.S. 5,868,619).

Wood et al. (U.S. 5,858,619) discloses a progressive gaming control/communication system and method for playing a poker game having a plurality of progressive jackpots that is implemented in a slot machine(s). Wood et al. additionally discloses:

Application/Control Number: 09/499,592

Art Unit: 3713

Regarding Claims 23, 35, 58, and 70:

- providing a first progressive jackpot and a second progressive jackpot for a gaming system (Column 4, line 33-Column 5, line 6 and Column 8, lines 43-58);
- receiving a wager in the gaming system (Column 2, lines 10-11 and Claim 1);
- providing a random gaming result in the gaming system (Claims 1-5);
- paying a first progressive jackpot if the random gaming result is a winning progressive jackpot result and if the wager is at least a first wager amount (at least \$1.00) (Column 4, line 33-Column 5, line 6 and Column 8, lines 43-58).

Wood et al. discloses a plurality of progressive jackpots, however, Wood et al. is silent to:

• paying a second progressive jackpot if the random gaming result is the winning progressive jackpot result and if the wager is at least a second wager amount.

However, Wood et al. teaches in order to be eligible for the additional progressive bonus the player would have to wager an additional \$1.00 to the initial \$5.00 wager. Therefore, it would have been obvious at the time of applicant's invention to require at least an additional \$1.00 be required to be eligible for each additional progressive jackpot. One would be motivated to do so such that each progressive jackpot could be increased by a portion of the player's additional wager in order to have a plurality of large progressive jackpots enabling player's the opportunity to receive one of a plurality of progressive jackpots that could be in the range of several hundreds of thousands if not millions of dollars. Having a plurality of progressive jackpots provides the illusion that the player has a much better chance of obtaining the big payout than would otherwise be the case with only one big payout.

Allowable Subject Matter

4. Claims 24-34, 36-46, 59-69, and 71-81 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Although Wood et al. discloses paying out a plurality of progressive jackpots, claims 47-57 and 82-92 are allowable over the prior art of record because the prior art lacks disclosing, teaching, or fairly suggesting paying the largest of either the first progressive jackpot or the second progressive jackpot if the random gaming result is a winning progressive jackpot result. This statement is not intended to necessarily state all of the reasons for allowance or all the details why the claims are allowed and should not imply that all the reasons for allowance have been set forth.
